

Getting Starting and Installing Printer Drivers

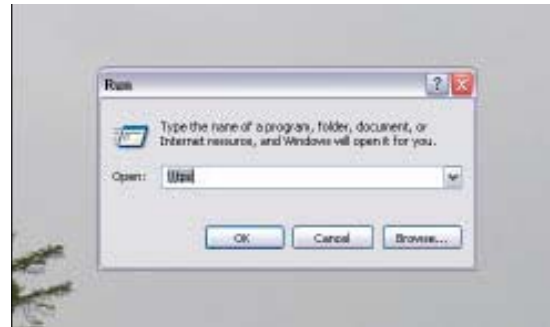

1. Start off by making sure you are logged on to your CAPD domain account.

2. Delete the old TPC plotters (if you do not have any old drivers please skip to step 3) by opening your control panel, and then opening

3. To install the new TPC printers, open the Start menu, and click “Run.”

3a. In the box, type in “\\tpc” and hit “OK.” This should bring up a window listing all the available TPC printers.

3b. Select only the following TPC printers:

DesignJet 1050C on HP

Laser Jet 5000

Xerox Phaser 7760

Design Jet 500PS

Design Jet 800

Drag and drop the TPC printers into your own “Printers and Faxes” folder and your done!!!
